

MANY HEAR BISHOPS

English Prelate Greeted by Brotherhood Men.

BRIEF TALKS ON "INFLUENCE"

Declares Much Good or Bad May Be Done Unconsciously—Sessions of the Episcopal Organization Continue Throughout Entire Day—Juniors Hold Their Meetings.

"I have found some good men among the rich, and I want to impress upon you this one fact, that nothing is such cheap claptrap as the talk that all the rich are bad and all the poor are good."

Before an audience that increased rapidly when the address was concluded, the Lord Bishop of London talked for twenty minutes yesterday morning to the Brotherhood of St. Andrew in Continental Hall. His address, evidently extemporaneous and heartfelt, made a deep impression on his hearers, not so much because it was pretentious or oratorical, but because it was simple and direct and eloquent.

When the bishop appeared in the hall, the entire assemblage rose to its feet, paying him that silent respect, instead of bursting into cheers. Declining the use of the President's carriage, he had walked from the White House, accompanied by Silas McBee, editor of the Churchman; President Houghteling, of the convention, and Rev. Dr. Anderson, the chaplain.

Garb Attracts Attention.

He was clad in the usual manner of an Anglican divine, with knee-breeches and Roman collar, but distinguished from his fellows by the gold cross which hung on his breast and the episcopal ring.

The lord bishop gives no impression of brawn.

When he arose, at the request of President Houghteling, after having spent some moments in silent prayer, the assemblage applauded him to the echo, and it was five minutes before he raised his hand to quiet them.

Glad to Be Here.

He expressed his delight at being able to come to America, and to Washington, and to a meeting of the Brotherhood, especially since—and the bishop's eyes twinkled—he had been offered \$500 and his expenses to go elsewhere. Before laying down the cardinal qualifications necessary for influence upon others, the bishop asked his hearers to keep in mind that it was the unconscious influence that every man exerts, rather than the conscious influence, which really counts.

He said further that there was no member of the brotherhood who did not exert some influence, either good or bad.

"What I mean by the influence of a man among men," he said, "is the amount of conscious or unconscious good that he does by the influence of his example. The scope of conscious influence is infinitesimal when compared with unconscious influence. I know for myself, that I usually make a most awful mess of it when I try consciously to influence anyone. I also know by many examples that I have reached further and better in almost all directions when I was least aware of it."

Must Be Straightforward.

"The first secret of a man's influence among his fellows is that he must be absolutely straight and straightforward. This is one of the first qualifications of your President, with whom I have had three or four hours of most interesting conversation during the past two days. The second secret is that a man must not have too good an opinion of himself. The boys at school, at college, and the men on the street will have no use for a man who is consumed with his own importance. In England we express it by saying a man must have no side. Since coming to your city I have learned that you express the same thing by saying a man must have no frills.

"The third secret is a saving sense of humor. The fourth is the possession of a serious object in life—seriousness at the bottom of character—and the fifth is sympathy. The last and crowning secret for one who would have influence with his fellow-men, is faith. People who cannot believe in anything always turn to the man of faith in time of stress."

Conducts Question Box.

The prayer at last night's meeting was pronounced by J. Pointz Tyler, Archbishop of Virginia, who was followed by Hubert Carleton, general secretary of the brotherhood, who conducted his interesting question-box, which has been the feature of many conventions in other places. Mr. Carleton invited all sorts of questions regarding the work of the brotherhood and answered them with an alacrity which astounded the audience. Some of his replies were serious, others witty, but all were to the point. He developed clearly the reasons for the brotherhood, and the need of it, and seemed to have no difficulty in making clear all doubts as to the work of the organization.

Rev. Mr. Hill Speaks.

Rev. F. H. Hill, O. H. C., West Park, N. Y., then spoke on "The boy and church," and said that the boys were the strength and the church in America could look for her future. The meeting was closed by prayer by Rev. Mr. Hill.

At a meeting of the United States Council at the Ebbitt House after the conference last night, the present officers were unanimously re-elected. They were: Robert H. Gardner, of Boston, president; H. W. English, of Pittsburgh, vice president; W. M. Kline, of Philadelphia, vice president; C. C. Payne, of Brookline, Mass., treasurer, and Hubert Carleton, general secretary.

Devotional exercises marked the opening of the sessions yesterday morning, when the bishops, presbyters, and laymen assembled in the Church of the Epiphany at 7 o'clock and participated in the annual celebration of the corporate communion.

Celebrate Communion.

Right Rev. Bishop D. S. Tuttle, presiding bishop of the American church, was the celebrant. He was assisted by Bishops Doane, Montgomery, and Parmenter. The Lord Bishop of London was seated in the chancel.

In the further election of the United States Council, W. B. Dent, of St. Paul's Church, was chosen to be associated with

QUARRYING THE FOUNDATION STONE.

Block that will be put in place to-day came from the Holy Land.

Bert T. Amos, of Trinity Church, and to be the successor of the late Gen. Cecil Clay.

The "Joy of Sacrifice" was the subject of an address by Most Rev. Enos Nuttall at the meeting for prayer at Continental Hall at 10 o'clock, and at the conclusion of the service, Hubert Carleton, general secretary of the Brotherhood of St. Andrew, conducted the opening of the question box. A series of resolutions looking to more active prosecution of the work of the Brotherhood of St. Andrew was presented to the meeting and adopted.

Report Is Adopted.

The report and recommendations of the international council were also adopted. By unanimous consent, the international committee was given permission to increase its membership as the occasion might require.

The nominations for members of the national committee, as made by a special nomination committee, were ratified by the convention, and the following seven delegates were added to the list printed in yesterday's Washington Herald:

George R. Ballou, St. Paul's, Buffalo, N. Y.; George H. Batcher, Grace, Memphis, Tenn.; Edwin Belknap, St. Paul's, New Orleans, La.; W. B. Dent, St. Paul's, Washington, D. C.; E. A. Fuchs, Christ Church, Nashville, Tenn.; A. A. McKenzie, St. John's, St. Paul, Minn.; J. H. Radtke, St. John's, Milwaukee, Wis.

A meeting in the interest of the "forward movement" concluded the morning session, and at 11 o'clock, cards of subscription for furthering the work during the next year were passed among the brotherhood and liberally signed.

Junior Conference Held.

The first meeting yesterday afternoon was devoted to a general conference for juniors. "What a boy can do" was the first subject discussed. The speaker was Bert Allen, St. Simon's Junior Chapter, Toronto, Canada. He said that the whole world was watching the boy with the brotherhood button, and that each wearer bore the honor of the brotherhood. He said that the influence of the brotherhood boy must be good or the brotherhood was worthless, and that there should be no sign of meanness in either the classroom, the office, or on the athletic field.

Marvin Kent Curtis, St. Simon's Junior Chapter, Chicago, next took up the thread of the discourse on what a boy can do. He reminded the juniors that the boy will become a man, and that as a boy forms his character, so the man will be. He said that the easiest way for a man to be a Christian was to follow the precepts of the brotherhood, and that it is the duty of every Junior to help some other man.

Lays Down Rules.

To do this work, he said, the following rules could be followed to advantage: Earnest prayer, honest endeavor, strength, insight into character, and no vulgarity.

Frank Hubert, Ascension Chapter, Buffalo, and Donald C. Stuart, Syracuse, N. Y., Trinity Junior Chapter, also discussed the boy.

At the general conference which followed, Rev. Floyd W. Tomkins, D. D., rector of Holy Trinity Church, Philadelphia, spoke on "The consecration of the body," while Very Rev. Dean Hodges, dean of the Episcopal Theological Seminary, at Cambridge, Mass., delivered an address on "The consecration of the mind."

The conference for seniors on junior work followed. It was conducted by W. A. Haberstro, field secretary of the Brotherhood of St. Andrew.

NOTES OF THE CONVENTION.

At the request of Chief Marshal Sylvester, major and superintendent of police, the marshals for the brotherhood affair at Mount St. Alban this afternoon are instructed to call by telephone this morning A. J. Shippert, telephone 2119, for instructions, in case it is raining at 9 o'clock.

Bishop Jacobs, of St. Alban's, will conduct the morning service at St. Thomas' Church this morning.

The Brotherhood of St. Andrew makes a special effort to observe Lent according to the canon of the Episcopal Church.

The old Falls Church, which was in George Washington's parish, is only a few miles from the city. He was a vestryman in that church, and was also on the building committee. It is a half-hour's ride from the Ebbitt House.

In case of rain to-day, the open-air meeting will be held in Convention Hall at 8 o'clock. Not Continental Hall.

President Moughteling held a meeting for men and boys yesterday afternoon, in which he exhorted them to continue faithful to their obligations.

Hubert Carleton took a fling at what some one called the higher critics last night by saying that in five years there would be higher critics and the present-day ones in oblivion, and so on, ad infinitum.

The business meetings of the brotherhood were concluded yesterday. To-day will be given over to devotional exercises.

The Chicago delegation, which had its picture taken yesterday, can obtain copies at the Hotel Elmsere.

Rev. Henry T. Sharp, rector of the Prince of Peace Church, Walbrook, Baltimore, who has been attending the convention here, left for home last night.

A conference of the clergy was held yesterday afternoon at 5 o'clock.

Members of the Newark Local Assembly, in Northern New Jersey, had a conference yesterday at Continental Hall.

Right Rev. Bishop Woodcock, of Kentucky, will be the preacher at 9:30 this morning.

The following are the local delegates to the Richmond tercentennial: Rev. Alfred Harding, pastor of St. Paul's Church,

Rev. Richard P. Williams, pastor of Trinity Church; Rev. Randolph McKim, pastor of Epiphany Church; Rev. A. S. Brown, pastor of Christ Church; A. S. Johns, Chas. S. Stanley, Dr. W. C. Reeves, and Thomas Nelson Page.

Bishop Brent, of the Philippines, will preach at the Pro-Cathedral this morning at 9:30.

In sixteen years the number of Japanese clergy in the Episcopal Church increased from ten to sixty-two.

The total registration up to last night neared the 1,000 mark.

The two rules of the brotherhood are the rule of prayer and the rule of service.

Bishop Brewer, of Maine, will deliver a short address to-night, at 8 o'clock, at St. Mark's Church.

The rain last night kept few away from the convention, and the faithful delegates expressed the feeling that it was the best test that the brotherhood was really in earnest.

The Right Rev. Bishop of Salina will preach at St. James' Church this morning and evening.

Bishop Cravatt, of West Virginia, and Bishop Claiborne, of North Carolina, will be the preachers at Trinity Church this morning and evening.

Most of the clergy present at the convention will go to Richmond, while the laity will return to their homes to-day morning. A large party, however, will leave here to-morrow night for Jamestown.

The complete convention series will be furnished on application to The Washington Herald.

On every hand were heard expressions of gratitude to the Daughters of the American Revolution for granting the use of Continental Hall.

The boys' conference yesterday afternoon was the only one which lived up to its time schedule.

PURDY AND KELLOGG HERE

"Trust Busters" Come to Washington for Conferences.

Man Who Is "Pumping" Standard Sees President and Bonaparte About Harriman Case.

Two important events in the "trust-busting" department of the government were recorded yesterday.

Milton D. Purdy, assistant to the Attorney General, who has charge of all trust investigations and prosecutions, arrived in Washington last evening from a two months' European tour. Frank B. Kellogg, who has been Purdy's right-hand man, and who is now conducting the dissolution suit against the Standard Oil Company, conferred by special appointment with President Roosevelt and Attorney General Bonaparte on the Harriman case.

The Department of Justice is now prepared to take up the work of weeding out "bad trusts" at the point where it was interrupted by the heat of summer.

The first case to be taken up probably will be that against the National Harvester Company, prosecution of which has been delayed by trial of the Standard Oil rebate cases at Chicago.

Charges of an illegal combination of New England railroads, reports on which have already reached the department, will be carefully sifted. Investigations against the shoe machine company and the paper trust will be pushed. Charges that an illegal combination exists in woolen goods and among certain wholesale produce dealers in Pittsburgh and elsewhere will be looked into.

The question whether there has been an illegal combination in restraint of trade by the Harriman roads may reach an early solution. The Interstate Commerce Commission report, which set forth the existence of such combination, but failed to recommend prosecution, has already received the serious consideration of the Attorney General.

Examinations at Alexandria.

Because of a lack of space in the Census Office, applicants for positions under the Civil Service Commission will be compelled to take examinations at Alexandria, Va.

Building Inspector Ashford said last night that the school at the Petworth School was formerly used as a playroom, and was well lighted and ventilated. It was used last session, he said, as a schoolroom, and was regarded as well suited for that purpose.

Mr. George Well Stone, Mrs. Howard, and Mrs. Wells were appointed a committee to find rooms that can be rented for the primary grades. A second meeting will be held next Wednesday, at which will be determined the date upon which the mothers will visit the Commissioners and ask that the children be removed to rented quarters.

ASHFORD EXPLAINS

Tells Why McKinley School Plans Are Not Ready.

BOARD DELAYED ANY ACTION

Official Details Given of Action of School Authorities and Engineer Commissioner in Regard to the Changes in Specifications—Insufficient Sketches Submitted.

"The law provides that the school plans shall be prepared under my supervision, and if I had been permitted to prepare those of the McKinley Manual Training School without the three changes required by the board of education, they would have been ready last January," said Building Inspector Ashford yesterday in reference to the delay in the erection of that institution.

"The site for the McKinley," continued Mr. Ashford, "was acquired in July, 1926, and in October the architect began work upon plans submitted by the director of manual training. On January 25, 1927, the Engineer Commissioner wrote to the board, calling attention to the insufficiency of the sketches.

"The architect estimated that on the plans prepared by him the building would cost \$100,000 more than the appropriation."

"In answer to this, the Engineer Commissioner was informed by letter that the board had decided to ask for an additional appropriation, and that the architect would do nothing toward completing the plans until it was known whether or not there were to be additional funds."

Changes Suggested.

"At the same time changes in the plans in respect to an assembly hall were suggested. The additional appropriation was not granted, and on February 13 the Engineer Commissioner again wrote to the board asking what it desired to do with the money available. Various changes in the plans were suggested by the board of education, and on April 22 the Engineer Commissioner wrote to the board explaining that the alterations desired by the board would reduce the seating capacity by 150 seats, and asking that all suggestions be sent in at once to avoid further changes in the plans. No reply was received to this letter, and on May 27 I wrote to the Engineer Commissioner calling attention to the fact that the delay in answering the communication as to the assembly hall was holding back the plans, and would throw the work into the winter weather."

Omits Corridors.

"This fact was communicated to the board, and on June 24 the president replied that 'on motion the board ordered both corridors omitted,' which restored the assembly hall to the condition originally intended, but necessitated a fourth revision of the plans. So it will be seen that the architect was not permitted to proceed until this date. The plans were completed in August and submitted to me. It requires about two weeks to advertise, and therefore, the bids should be received in October."

"If the school board had not insisted on the change in the second set of plans, which action they reversed in their letter of May 24, they would have been completed last March and the work started in April. But even under the most hurried and unusual conditions, the building could not have been ready for occupancy this fall, as it is a large fireproof structure and will take nearly a year to build."

PROTEST AT BASEMENT.

Parents of School Children Want New Quarters.

Protest against placing the children of the primary grades of the Petworth School in the basement of the building will be made to the Commissioners this week, in the form of a petition signed by 56 percent of the mothers of Petworth.

Because of the alleged dampness of the present quarters, as a result of which, it is said, many of the children have contracted coughs and colds, the Commissioners will be asked to provide new rooms at once. Health Officer Woodward said yesterday that he would receive a report on the condition of the Petworth rooms to-morrow, which will be referred to the Commissioners. If conditions are deemed worthy of remedy, the matter will be placed in the hands of the board of education or the Engineer Commissioner.

The subject was thoroughly discussed at a meeting in the home of Mrs. George Hough, 700 Randolph street, Friday night. It was alleged that owing to the dampness of the present quarters, many of the children had become ill, as a result of which they had lost weeks of schooling. Moreover, it is alleged that the children's eyes will be affected if they are kept in rooms that are lighted only on one side.

Mrs. George Well Stone, Mrs. Howard, and Mrs. Wells were appointed a committee to find rooms that can be rented for the primary grades. A second meeting will be held next Wednesday, at which will be determined the date upon which the mothers will visit the Commissioners and ask that the children be removed to rented quarters.

CATHEDRAL STONE TO BE LAID TO-DAY

CONTINUED FROM PAGE ONE.

act as an advisory board, regarding the site of the cathedral and the method of procedure in the choice of architects. At the end of four months this board unanimously advised that the cathedral should be built on the highest part of the Close, from which the ground slopes on every side; that there should be no competition whatever, and that the man, not the plan, should be chosen. Regarding the style of architecture, there were differences of opinion; but that was a closed question, as the chapter had already unanimously decided that the style should be Gothic.

It was then decided, also, after accepting this report, that different architects in America and England should be invited, not to send in plans for the future cathedral, but drawings of Gothic work which had been designed and completed by them. During the summer of 1936, while members of a cathedral committee appointed by the chapter were extending this invitation to and corresponding with different American architects, the bishop of the diocese went to England, and the opportunity of conferences with bishops of the English Church, and with architects and others who were skilled in Gothic architecture.

Design Is Accepted.

In October, 1936, the bishop and special committee reported at a chapter meeting what they had done during the summer. The chapter then, by a unanimous vote, selected Henry Vaughan, of Boston, and Dr. G. F. Bodley, R. A., of London, to prepare and present designs for the Washington Cathedral. In December last Messrs. Vaughan and Bodley came to this city to study the site and confer with the chapter. Six months after they submitted the designs, and, after careful
